## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of the first species (readable on claims 1 through 6, 8, and 9) in Paper No. 7 is acknowledged. The traversal is on the ground(s) that the embodiments including electric or electronic devices mounted in the manifold represents "an additional feature of the basic system disclosed in the application" and "not an alternative feature". Nevertheless, the originally filed specification (see pages 5 and 6) clearly describes the embodiments of Figures 7 through 9 as being alternative embodiments. In other words, there are embodiments or species of the invention which, for example, include electric or electronic devices mounted in the manifold and ones which do not. Applicant's traversal is not found persuasive because the requirement is still deemed proper and is therefore made FINAL.

Claim 7 and 10 are thus hereby withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to the nonelected second and third species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

### ***Specification***

The abstract of the disclosure is objected to because it does not avoid the form and legal phraseology common to patent claims (i.e., comprising). Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Art Unit: 3743

Claims 1 through 6, 8, and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They are written in a run-on fashion, appear to be a literal translation into English from a foreign document, and are replete with grammatical and idiomatic errors.

Claim 6 as written appears to have a word or words missing therefrom and is generally incomprehensible as written.

*Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 through 6, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by *Zechin*.

*Zechin* discloses a motor vehicle 10 comprising a passenger compartment 16 with an engine or front compartment 14 arranged in front thereof, comprising an engine cooling radiator 56, a manifold 20 and 30 having a variable cross-section, an airflow outlet section 32 and 38, an engine 42, a box 30, and a generator 26 readable on the battery.

The reference thus reads on the claims.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
